

Renae Steichen | Clean Economy Practice Manager

Renae Steichen is a project manager focusing on Clean Economy issues, as well as economic strategy, policy analysis, and workforce development. She has led the research, analysis, and writing for a number of reports at Collaborative Economics, including the California Green Innovation Index, California's Advanced Transportation Industry Clusters of Opportunity, Cleantech Investment: A Decade of California's Evolving Portfolio, and the Clean Energy Economic Development Series. Renae also provides technical assistance by working directly with cross-functional teams in California regions and organizations across the country, such as for the Department of Labor Green Job Innovation Fund grant, and has led technical assistance efforts for the AB 118 Advanced Transportation Regional Industry Clusters of Opportunity grant efforts.

Previously, Renae worked for five years in Washington, D.C. as a sustainability and policy analyst for SRA International (formerly Sentech) in the Sustainable Energy and Environment group and at the U.S. Department of Justice in their internal environmental program. She holds a bachelor's degree in Politics and Environmental Policy from Drake University and a Master of Public Policy from The George Washington University.
